<b>Product Description</b>	
<b>Description</b>	<p>Lightning-Link is an innovative technology that enables direct labeling of proteins, peptides or other biomolecules. The researcher simply pipettes the biomolecule into a vial of lyophilized mixture containing the label of interest and incubates. Despite its apparent simplicity, the Lightning-Link process is sophisticated and generates conjugates with performance characteristics identical to, or better than, those prepared with laborious multistep conjugation procedures.</p> <p><b>Features</b>  <b>Benefits</b>            30 seconds hands-on time            Easy to use antibody labeling kit            No separation steps            Antibody recovery is 100%            No losses            Applicable to Western Blott, ELISA, Immunohistochemistry, Immunofluorescence, and FACS analysis            Scalable technology            From 10 ug up to 5 mg</p>
<b>Kit Components</b>	1 or 3 glass vial(s) of Lightning-Link mix, 1 vial of LL-Modifier reagent, 1 vial of LL-Quencher reagent
