

Novus Antibody Grant Program

Program Details

Want your antibody produced for free? The Novus Biologicals' Product Development Team selects one Antibody Grant applicant each month. The awardee will receive 0.2mg of affinity purified rabbit sera to test. Antibody production takes 4-5 months. If the antibody works and the awardee supplies the necessary documentation, the awardee will receive 2.0 mg of antibody in exchange for product feedback. Applications must be submitted by the last business day of the month to be evaluated in the month's submission. Email applications to collaborations@novusbio.com or fax to 303-730-1966.
