# 321-0015

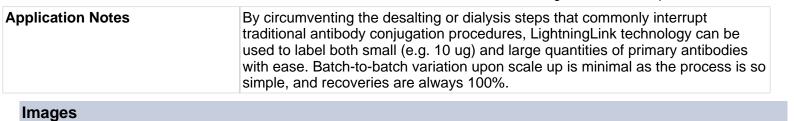

Lightning-Link (R) Rapid DyLight 405 Antibody Labeling Kit

use of this product.   Storage Store at -20C.   Conjugate DyLight 405   Product Description Eightning-Link Rapid is an innovative technology that enables direct labeling of proteins, peptides or other biomolecules for use in R&D applications, drug discovery and the development of diagnostic kits (See protocol for further information).   The easy-to-use, one step procedure allows researchers to covalently label biomolecules with only 30 seconds hands-on time; furthermore conjugates are ready to use in less than twenty minutes.   The researcher simply pipettes the biomolecule into a vial of lyophilized mixture containing the label of interest and incubates (for more details please watch the video below).   FeaturesBenefitsQuick and easy to useSave time, no special knowledge requiredNo separation steps100% recovery - no antibody/protein lossCan be used in a wide range of applicationsFlexibleFreeze driedShips at ambient temperature, long shelf-lifeFully scalable (10 ug to 1 g or more)Easy transfer from R&D to manufacturingStringently QC testedConsistent high quality, excellent batch-to-batch reproducibilityLarge number or labels available   DyLight 405 provides blue fluorescence for a wide array of fluorescence at 428m (extinction coefficient 3.0 x104 cm-1M-1) and high quantum yield.   Learn more about Lightning-Link™ Conjugation Kits by reading EAQs   For more information please check out these useful links!   Antibody Conjugation Illustrated Assay   Kit Components 1 or 3 glass vial(s) of Lightning-Link Rapid mix, 1 vial of LL-Rapid Modiflier reagent, 1 vial of LL-Rapid Quencher		
Concentration   Concentration is not relevant for this product. Please see the protocols for proper use of this product.     Storage   Store at -20C.
