BEK-2056-2P**Mouse Laminin ELISA Kit**

Product Information	
Unit Size	1 PACK
Concentration	Concentration is not relevant for this product. Please see the protocols for proper use of this product.
Storage	Store at 4C. Do not freeze.
Product Description	
Gene ID	284217
Gene Symbol	LAMA1
Species	Mouse
Reactivity Notes	Mouse
Marker	Schwann Cell Marker
Specificity/Sensitivity	Mouse Laminin
Immunogen	Laminin is a large (900 kDa) complex extracellular glycoprotein and a major component of the basement membrane. Laminin is thought to mediate the attachment, migration, and organization of cells into tissues during embryonic development by interacting with other extracellular matrix components. Laminin is composed of three different polypeptide chains; alpha, beta and gamma which are bound to each other by disulphide bonds into a cross-shaped molecule. Isoforms have been detected for all three chains. The different combinations of the alpha, beta and gamma chains give rise to at least 15 laminin heterotrimers.
Notes	This kit contains 2.0 x 96.0 Well Strip.
Product Application Details	
Applications	ELISA
Recommended Dilutions	ELISA 156pg/ml-10000pg/ml
Application Notes	This product is useful for Sandwich ELISA detection. Strip format Biosensis ELISA kits offer the highest level of sensitivity available Strip 96-well format, use only what you need: High sensitivity and low blank Suitability for serum & tissues Reproducible results This kit contains: Pre-coated plates, Prepared standards Buffers, Detection reagents, Substrate Precise methods/instructions.
