Survivin Antibody

Product Information	
Unit Size	0.05 ml
Concentration	This product is unpurified. The exact concentration of antibody is not quantifiable.
Storage	Store at -20C. Avoid freeze-thaw cycles.
Clonality	Polyclonal
Preservative	0.05% Sodium Azide
Isotype	IgG
Purity	Unpurified
Buffer	Whole antisera
Target Molecular Weight	16 kDa
Product Description	
Host	Rabbit
Gene ID	332
Gene Symbol	BIRC5
Species	Human, Mouse, Rat, Gerbil
Reactivity Notes	Immunogen displays the following percentage of sequence identity for non-tested species: guinea pig (87%). Rat reactivity reported in scientific literature (PMID: 18358624). Mouse reactivity reported in scientific literature (PMID: 28011476). Human reactivity reported in scientific literature (PMID: 24916171).
Immunogen	This Survivin Antibody was developed against full-length recombinant human survivin protein.
Product Application Details	
Applications	Western Blot, Immunohistochemistry, Immunohistochemistry-Frozen, Immunohistochemistry-Paraffin, Immunoprecipitation
Recommended Dilutions	Western Blot 1:1000-1:2000, Immunohistochemistry 1:10-1:500. Use reported in scientific literature (PMID 24916171), Immunoprecipitation 1:50-1:200, Immunohistochemistry-Paraffin 1:1000-1:5000, Immunohistochemistry-Frozen 1:10-1:500
Application Notes	The observed molecular weight of the protein may vary from the listed predicted molecular weight due to post translational modifications, post translation cleavages, relative charges, and other experimental factors.

Images

Western Blot: Survivin Antibody [NB100-56167] - Analysis of Survivin using [NB100-56167]. Survivin was detected in the two tumor cell lines, Jurkat (T cell lymphoma) and RS11846 (non-Hodgkin's lymphoma), but not in lysates from normal tissues. Survivin RP, full-length recombinant human survivin protein was used as a positive control. Bands observed slightly lower than the theoretical molecular weight, 16 kDa.

Western Blot: Survivin Antibody [NB100-56167] - Representative Western blots showing the IAP levels in EV derived from individual European American (EA) (N1-N5) & (N7-N9), *N6 and African American (AA) (N1-N9) patients with prostate cancer (PCa). Specific antibodies against Survivin, XIAP, cIAP-1, cIAP-2, and Lamp1 were used for the Western blotting analysis of total exosomal proteins. The blots from both patient groups were processed under identical conditions; Lamp 1 was used as loading control. (*N6, Hispanic.) (Both blots were done side by side in the same gel running and transferring apparatus, blocking, washing buffers, and antibody incubations were done in the same time, in the same incubating trays under the identical exposure to keep the consistencies). Image collected and cropped by CiteAb from the following publication (<https://dx.plos.org/10.1371/journal.pone.0183122>), licensed under a CC-BY license.

Immunohistochemistry: Survivin Antibody [NB100-56167] - Immunohistochemical analysis of Survivin in formalin-fixed paraffin-embedded human prostate and breast cancer using Survivin Antibody [NB100-56167]. A and A1, prostate cancer at low and high magnification, respectively. B and B1, breast cancer. B1 is a high magnification of an area of metastasis. Hematoxylin-eosin counterstain.

Immunohistochemistry-Paraffin: Survivin Antibody [NB100-56167] - Analysis of Survivin in a formalin-fixed paraffin-embedded human brain tissue microarray using Survivin Antibody [NB100-56167]. A. Differential expression of Survivin in brain tumors from six different patients. A1-A3, high magnification from A. A1, gemistocytic astrocytoma. A2, medulloblastoma. A3, choroid plexus papilloma. Hematoxylin-eosin counterstain.
