Product Datasheet

GAPDH Antibody (1D4)
NB300-221

Unit Size: 0.1 ml

Store at 4C short term. Aliquot and store at -20C long term. Avoid freeze-thaw cycles.

Reviews: 17  Publications: 257

## Product Description

**Description**
This GAPDH antibody (1D4) is primarily used as a loading control in western blots due to the near global expression of GAPDH which can be attributed to its vital role in the glycolytic metabolic process.

**Host**
Mouse

**Gene ID**
2597

**Gene Symbol**
GAPDH

**Species**
Human, Mouse, Rat, Porcine, Avian, Bovine, Chicken, Equine, Feline, Hamster, Opossum, Primate, Sheep, Zebrafish

**Reactivity Notes**
Human, mouse, rat, bovine, porcine, avian, sheep, opossum and primate. Likely to react with other mammals as well. Hamster, zebrafish and feline reactivity reported by customer reviews. Chicken reactivity reported in scientific literature (PMID: 24725420)

**Marker**
Cytosolic Marker

**Immunogen**
Purified porcine GAPDH [UniProt# P00355]

## Product Application Details

**Applications**
Western Blot, Simple Western, Chromatin Immunoprecipitation, Immunocytochemistry/Immunofluorescence, Immunohistochemistry, Immunoprecipitation

**Recommended Dilutions**
Western Blot 1:1000, Simple Western 1:25, Chromatin Immunoprecipitation 1:10 -1:500, Immunohistochemistry, Immunocytochemistry/Immunofluorescence 1:100, Immunoprecipitation
**Application Notes**

This GAPDH Antibody (1D4) is useful for Western blot and Immunocytochemistry/Immunofluorescence. Immunohistochemistry was reported in scientific literature. In WB a prominent band can be seen at approximately 38 kDa. This antibody makes an excellent loading control for Western blot experiments. Use in immunoprecipitation reported in scientific literature (PMID 24032460). Use in chromatin immunoprecipitation reported in scientific literature (PMID 25802280).

In Simple Western only 10 - 15 uL of the recommended dilution is used per data point. Separated by Size-Wes, Sally Sue/Peggy Sue. The observed molecular weight of the protein may vary from the listed predicted molecular weight due to post translational modifications, post translation cleavages, relative charges, and other experimental factors.

**Images**

**Western Blot**: GAPDH Antibody (1D4) [NB300-221] - analysis of GAPDH in human nucleus pulposus cell culture (40ug/lane) using anti-GAPDH antibody. LI-COR Odyssey imaging system was used for detection. Image from verified customer review.

**Western Blot**: GAPDH Antibody (1D4) [NB300-221] - Analysis of cell line lysates probed with mouse mAb to GAPDH, NB300-221, dilution 1:2,000: [1] protein standard, [2] HEK293, [3] HeLa, [4] SH-SY5Y, [5] COS1, [6] NIH-3T3, and [7] C6 cells. The GAPDH antibody reveals a single band at ~37 kDa in all cell lines. GAPDH is a house keeping protein, the level of which is relatively unaffected by most experimental manipulations, and, as a result, this antibody has been widely used as a western blotting loading control.

**Immunocytochemistry/Immunofluorescence**: GAPDH Antibody (1D4) [NB300-221] - SH-SY5Y cells stained with GAPDH antibody NB300-221 (green) and Neurofilament Heavy antibody NB300-217 (red), counterstained with a fluorescent DNA probe (blue).
Western Blot: GAPDH Antibody (1D4) [NB300-221] - analysis of GAPDH in chicken pectoralis major using anti-GAPDH antibody. The primary antibody was used at a dilution of 1:4000, incubated for 1 hour at room temperature. Image from verified customer review.

Immunocytochemistry/Immunofluorescence: GAPDH Antibody (1D4) [NB300-221] - SH-SY5Y cells stained with GAPDH antibody NB300-221 (green). Nuclear DNA is stained with Hoechst dye (blue).
