#### NBL1-10208

EIF4EBP3 Overexpression Lysate

Product Information			
0.1 mg			
The exact concentration of the protein of interest cannot be determined for overexpression lysates. Please contact technical support for more information.			
Store at -80C. Avoid freeze-thaw cycles.			
RIPA buffer			
10.7 kDa			
EIF4EBP3 Transient Overexpression Lysate			
Expression Host: HEK293T			
Plasmid: RC210053			
Accession#: NM_003732			
Protein Tag: C-MYC/DDK			
You will receive 1 vial of lysate (100ug), 1 vial of empty vector negative control (100ug), and 1 vial of 2xSDS sample buffer (250ul). Each vial of cell lysate contains 100ug of total protein (at 1 mg/ml). The 2xSDS Sample Buffer consists of 4% SDS, 125mM Tris-HCl pH6.8, 10% Glycerol, 0.002% Bromophenol blue, 100mM DTT.			
8637			
EIF4EBP3			
Human			
HEK293T cells in 10-cm dishes were transiently transfected with a non-lipid polymer transfection reagent specially designed and manufactured for large volume DNA transfection. Transfected cells were cultured for 48hrs before collection. The cells were lysed in modified RIPA buffer (25mM Tris-HCl pH7.6, 150mM NaCl, 1% NP-40, 1mM EDTA, 1xProteinase inhibitor cocktail mix, 1mM PMSF and 1mM Na3VO4, and then centrifuged to clarify the lysate. Protein concentration was measured by BCA protein assay kit.			
Overexpression			
Western Blot			
Western Blot			

Application Notes	This product is intended for use as a positive control in Western Blot. Overexpression of the target protein was confirmed using an antibody to DDK (FLAG) epitope tag ( <u>NBP1-71705</u> ) present on the protein construct.
	Each vial of cell lysate contains 100ug of total protein which should be sufficient for 20-50 reactions. Depending on over-expression level, antibody affinity and detection system, some lysates can go as low as 0.1 ug per load. We recommend starting with 5ug of cell lysate. Add an equal amount of cell lysate and 2X SDS Sample buffer and boil the SDS samples for 10 minutes before loading.

Western Blot: EIF4EBP3 Overexpression Lysate (Adult Normal) [NBL1- 10208] Left-Empty vector transfected control cell lysate (HEK293 cell lysate); Right -Over-expression Lysate for EIF4EBP3.	158 - 106 - 79 - 48 -
