NBP1-30438-0.5mL**High Efficiency Transfection reagent Transfection Reagent Kit**

Product Information	
Unit Size	0.5 ml
Concentration	Concentration is not relevant for this product. Please see the protocols for proper use of this product.
Storage	Store at 4C. Do not freeze.
Buffer	Prediluted antibody

Product Description	
Species	Non-species specific
Notes	<p>Major Features:</p> <p>Exceptional efficiency of transfection for a broad range of adherent cell types. Especially good for embryonic stem (ES) cells and difficult-to-transfect primary cultures.</p> <p>Equally efficient for suspension cultures of HEK293, and sf9, sf21 and High 5 insect cells.</p> <p>Higher efficiency and lower toxicity than all commercially available transfection reagents currently on the market.</p> <p>Transfection efficiency not affected by serum. Works equally well in serum-containing (up to 20% FBS) or serum-free media.</p> <p>High levels of recombinant protein production at 24-72 hours after transfection. Works very well for both single DNA transfection and multi-DNA co-transfection.</p> <p>This product has a prediluted size available. If a 6mL or 7mL pre-diluted size is purchased this product can be used Neat (without further dilution). Use recommended dilution for the concentrated vials only.</p>

Product Application Details	
Application Notes	Use the following procedure to transfect DNA into eukaryotic cells in a 35 mm dish or a 6-well plate.
