| Buffer                      | PBS pH 7.2 (10 mM NaH <sub>2</sub> PO <sub>4</sub> , 10 mM Na <sub>2</sub> HPO <sub>4</sub> , 130 mM NaCl) containing 0.1% bovine serum albumin.         |
| Product Description         |                                                                                                                                                          |
| Description                 | <p>A blocking peptide containing 15 amino acids near the center of human ZEB1.</p> <p><b>Source:</b> <i>Synthetic</i></p> <p>(Accession #: CAI12550)</p> |
| Gene ID                     | 6935                                                                                                                                                     |
| Gene Symbol                 | ZEB1                                                                                                                                                     |
| Species                     | Human                                                                                                                                                    |
| Product Application Details |                                                                                                                                                          |
| Applications                | Antibody Competition                                                                                                                                     |
| Recommended Dilutions       | Antibody Competition                                                                                                                                     |
| Application Notes           | This peptide is useful as a blocking peptide for NBP1-77178. For further blocking peptide related protocol, click <a href="#">here</a> .                 |
