

# Product Datasheet

## LIGHT/TNFSF14 Antibody (Laury-1) - BSA Free NBP1-97619

Unit Size: 0.05 mg

Store at 4C short term. Aliquot and store at -20C long term. Avoid freeze-thaw cycles.

|----------------------|----------------------------------------------------------------------------------------|
| <b>Unit Size</b>     | 0.05 mg                                                                                |
| <b>Concentration</b> | 1.0 mg/ml                                                                              |
| <b>Storage</b>       | Store at 4C short term. Aliquot and store at -20C long term. Avoid freeze-thaw cycles. |
| <b>Clonality</b>     | Monoclonal                                                                             |
| <b>Clone</b>         | Laury-1                                                                                |
| <b>Preservative</b>  | 0.02% Sodium Azide                                                                     |
| <b>Isotype</b>       | IgG2a                                                                                  |
| <b>Purity</b>        | Protein G purified                                                                     |
| <b>Buffer</b>        | PBS                                                                                    |

**Product Description**

|                         |                                                          |
|-------------------------|----------------------------------------------------------|
| <b>Host</b>             | Rat                                                      |
| <b>Gene ID</b>          | 8740                                                     |
| <b>Gene Symbol</b>      | TNFSF14                                                  |
| <b>Species</b>          | Human                                                    |
| <b>Reactivity Notes</b> | Human                                                    |
| <b>Immunogen</b>        | Recombinant human HVEM extracellular domain (aa 39-200). |

**Product Application Details**

|                              |                                                  |
|------------------------------|--------------------------------------------------|
| <b>Applications</b>          | Flow Cytometry, Immunoprecipitation              |
| <b>Recommended Dilutions</b> | Flow Cytometry 1:1000, Immunoprecipitation 1:200 |

**Images**

Flow Cytometry: TNFSF14 Antibody (Laury-1) [NBP1-97619] - Detection of endogenous human HVEM with MAb to HVEM (human) (Laury-1). Method: Established melanoma cells ( $10^5$ ) were incubated on ice for 30 minutes with 2.5ug/ml of an isotype control (Figure A) or with 2.5ug/ml of MAb to HVEM (human) (Laury-1) (Figure B). The primary antibody was revealed with PAb to Rat IgG (FITC) and then analyzed by Flow Cytometry. The GMFI (geometric mean of fluorescence intensity) is shown.
