# Application NotesThis product is intended for use as a positive control in Western Blot.<br/>Overexpression of the target protein was confirmed using an antibody to DDK<br/>(FLAG) epitope tag (cat# NBP1-71705) present on the protein construct.Each vial of cell lysate contains 100ug of total protein which should be sufficient<br/>for 20-50 reactions. Depending on over-expression level, antibody affinity and<br/>detection system, some lysates can go as low as 0.1 ug per load. We<br/>recommend starting with 5ug of cell lysate. Add an equal amount of cell lysate<br/>and 2X SDS Sample buffer and boil the SDS samples for 10 minutes before<br/>loading.
