NBP2-09216

ATF3 Overexpression Lysate

Product Information					
Unit Size	0.1 mg				
Concentration	The exact concentration of the protein of interest cannot be determined for overexpression lysates. Please contact technical support for more information.				
Storage	Store at -80C. Avoid freeze-thaw cycles.				
Buffer	RIPA buffer				
Target Molecular Weight	15.1 kDa				
Product Description					
Description	ATF3 Transient Overexpression Lysate				
	Expression Host: HEK293T				
	Plasmid: RC215620				
	Accession#: NM_001040619				
	Protein Tag: C-MYC/DDK				
	You will receive 1 vial of lysate (100ug), 1 vial of empty vector negative control (100ug), and 1 vial of 2xSDS sample buffer (250ul). Each vial of cell lysate contains 100ug of total protein (at 1 mg/ml). The 2xSDS Sample Buffer consists of 4% SDS, 125mM Tris-HCI pH6.8, 10% Glycerol, 0.002% Bromophenol blue, 100mM DTT.				
Gene ID	467				
Gene Symbol	ATF3				
Species	Human				
Notes	HEK293T cells in 10-cm dishes were transiently transfected with a non-lipid polymer transfection reagent specially designed and manufactured for large volume DNA transfection. Transfected cells were cultured for 48hrs before collection. The cells were lysed in modified RIPA buffer (25mM Tris-HCl pH7.6, 150mM NaCl, 1% NP-40, 1mM EDTA, 1xProteinase inhibitor cocktail mix, 1mM PMSF and 1mM Na3VO4, and then centrifuged to clarify the lysate. Protein concentration was measured by BCA protein assay kit.				
Lysate Type	Overexpression				
Product Application Details					
Applications	Western Blot				
Recommended Dilutions	Western Blot				

Application NotesThis product is intended for use as a positive control in Western Blot.
Overexpression of the target protein was confirmed using an antibody to DDK
(FLAG) epitope tag (cat# NBP1-71705) present on the protein construct.Each vial of cell lysate contains 100ug of total protein which should be sufficient
for 20-50 reactions. Depending on over-expression level, antibody affinity and
detection system, some lysates can go as low as 0.1 ug per load. We
recommend starting with 5ug of cell lysate. Add an equal amount of cell lysate
and 2X SDS Sample buffer and boil the SDS samples for 10 minutes before
loading.
