# Connexin 30/GJB6 Overexpression Lysate NBP2-09370

Unit Size: 0.1 mg

Store at -80C. Avoid freeze-thaw cycles.

Plasmid: RC225346	e		
A			
Accession#: NM_001110220			
Protein Tag: C-MYC/DDK			
You will receive 1 vial of lysate (100ug), 1 vial of empty vector negative (100ug), and 1 vial of 2xSDS sample buffer (250ul). Each vial of cell ly contains 100ug of total protein (at 1 mg/ml). The 2xSDS Sample Buffe of 4% SDS, 125mM Tris-HCl pH6.8, 10% Glycerol, 0.002% Bromophe 100mM DTT.	sate r consists		
<b>Gene ID</b> 10804			
Gene Symbol GJB6			
Species Human			
Notes  HEK293T cells in 10-cm dishes were transiently transfected with a nor polymer transfection reagent specially designed and manufactured for volume DNA transfection. Transfected cells were cultured for 48hrs be collection. The cells were lysed in modified RIPA buffer (25mM Tris-H0 150mM NaCl, 1% NP-40, 1mM EDTA, 1xProteinase inhibitor cocktail PMSF and 1mM Na3VO4, and then centrifuged to clarify the lysate. Proconcentration was measured by BCA protein assay kit.	large fore CI pH7.6, mix, 1mM		
Lysate Type Overexpression			

# **Product Application Details**

Applications	Western Blot
<b>Recommended Dilutions</b>	Western Blot

#### **Application Notes**

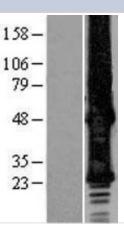

This product is intended for use as a positive control in Western Blot.

Overexpression of the target protein was confirmed using an antibody to DDK (FLAG) epitope tag (cat# NBP1-71705) present on the protein construct.

Each vial of cell lysate contains 100ug of total protein which should be sufficient for 20-50 reactions. Depending on over-expression level, antibody affinity and detection system, some lysates can go as low as 0.1 ug per load. We recommend starting with 5ug of cell lysate. Add an equal amount of cell lysate and 2X SDS Sample buffer and boil the SDS samples for 10 minutes before loading.
