NBP2-10847

Perilipin Overexpression Lysate

Product Information					
Unit Size (0.1 mg				
	The exact concentration of the protein of interest cannot be determined for overexpression lysates. Please contact technical support for more information.				
Storage	Store at -80C. Avoid freeze-thaw cycles.				
Buffer I	RIPA buffer				
Target Molecular Weight	55.8 kDa				
Product Description					
	Perilipin Transient Overexpression Lysate				
	Expression host. HER2931				
1	Plasmid: RC206292				
,	Accession#: NM_002666				
I	Protein Tag: C-MYC/DDK				
	You will receive 1 vial of lysate (100ug), 1 vial of empty vector negative contr (100ug), and 1 vial of 2xSDS sample buffer (250ul). Each vial of cell lysate contains 100ug of total protein (at 1 mg/ml). The 2xSDS Sample Buffer consi of 4% SDS, 125mM Tris-HCI pH6.8, 10% Glycerol, 0.002% Bromophenol blu 100mM DTT.				
Gene ID 5	5346				
Gene Symbol	PLIN1				
Species I	Human				
	HEK293T cells in 10-cm dishes were transiently transfected with a non-lipid polymer transfection reagent specially designed and manufactured for large volume DNA transfection. Transfected cells were cultured for 48hrs before collection. The cells were lysed in modified RIPA buffer (25mM Tris-HCl pH7.6, 150mM NaCl, 1% NP-40, 1mM EDTA, 1xProteinase inhibitor cocktail mix, 1mM PMSF and 1mM Na3VO4, and then centrifuged to clarify the lysate. Protein concentration was measured by BCA protein assay kit.				
Lysate Type	Overexpression				
Product Application Details					
rouder Application Details					
• •	Western Blot				

Application Notes	This product is intended for use as a positive control in Western Blot. Overexpression of the target protein was confirmed using an antibody to DDK (FLAG) epitope tag (cat# NBP1-71705) present on the protein construct.
	Each vial of cell lysate contains 100ug of total protein which should be sufficient for 20-50 reactions. Depending on over-expression level, antibody affinity and detection system, some lysates can go as low as 0.1 ug per load. We recommend starting with 5ug of cell lysate. Add an equal amount of cell lysate and 2X SDS Sample buffer and boil the SDS samples for 10 minutes before loading.

Western Blot: Perilipin Overexpression Lysate (Adult Normal) [NBP2-10847] Left-Empty vector transfected control cell lysate (HEK293 cell lysate); Right -Over-expression Lysate for Perilipin.
