NBP2-11424

IKK gamma Overexpression Lysate

Product Information	
Unit Size 0.1 mg	
ConcentrationThe exact concentration of the protein of interest cannot be determined overexpression lysates. Please contact technical support for more in	
StorageStore at -80C. Avoid freeze-thaw cycles.	
Buffer RIPA buffer	
Target Molecular Weight48 kDa	
Product Description	
Description IKK gamma Transient Overexpression Lysate Expression Host: HEK293T Expression Host: HEK293T Plasmid: RC218044 Accession#: NM_001099857 Protein Tag: C-MYC/DDK You will receive 1 vial of lysate (100ug), 1 vial of empty vector negative	
(100ug), and 1 vial of 2xSDS sample buffer (250ul). Each vial of cell contains 100ug of total protein (at 1 mg/ml). The 2xSDS Sample But of 4% SDS, 125mM Tris-HCl pH6.8, 10% Glycerol, 0.002% Bromop 100mM DTT.	l lysate ffer consists
Gene ID 8517	
Gene Symbol IKBKG	
Species Human	
Notes HEK293T cells in 10-cm dishes were transiently transfected with a n polymer transfection reagent specially designed and manufactured for volume DNA transfection. Transfected cells were cultured for 48hrs collection. The cells were lysed in modified RIPA buffer (25mM Tris- 150mM NaCl, 1% NP-40, 1mM EDTA, 1xProteinase inhibitor cockta PMSF and 1mM Na3VO4, and then centrifuged to clarify the lysate. concentration was measured by BCA protein assay kit.	or large before HCl pH7.6, ill mix, 1mM
concentration was measured by BCA protein assay kit.	
Lysate Type Overexpression	
Lysate Type Overexpression	

Application Notes	This product is intended for use as a positive control in Western Blot. Overexpression of the target protein was confirmed using an antibody to DDK (FLAG) epitope tag (cat# NBP1-71705) present on the protein construct.
	Each vial of cell lysate contains 100ug of total protein which should be sufficient for 20-50 reactions. Depending on over-expression level, antibody affinity and detection system, some lysates can go as low as 0.1 ug per load. We recommend starting with 5ug of cell lysate. Add an equal amount of cell lysate and 2X SDS Sample buffer and boil the SDS samples for 10 minutes before loading.
