NBP2-15952**Complement Component C9 Antibody****Product Information**

Unit Size	0.1 ml
Concentration	Concentrations vary lot to lot. See vial label for concentration. If unlisted please contact technical services.
Storage	Aliquot and store at -20C or -80C. Avoid freeze-thaw cycles.
Clonality	Polyclonal
Preservative	0.025% Proclin 300
Isotype	IgG
Purity	Antigen Affinity-purified
Buffer	PBS, 20% Glycerol
Target Molecular Weight	63 kDa

Product Description

Host	Rabbit
Gene ID	735
Gene Symbol	C9
Species	Human, Mouse, Rat
Immunogen	Recombinant protein encompassing a sequence within the center region of human Complement Component C9. The exact sequence is proprietary.

Product Application Details

Applications	Western Blot, Immunocytochemistry/ Immunofluorescence, Immunohistochemistry
Recommended Dilutions	Western Blot 1:500-1:3000, Immunohistochemistry, Immunocytochemistry/ Immunofluorescence 1:100-1:1000

Images

Immunohistochemistry: Complement Component C9 Antibody [NBP2-15952] - A generic staining of the vascular BMs was given by an antibody to the 7S domain of collagen IV $\alpha 3$ (C). Prominent staining for microvascular aneurisms was detected by staining with antibodies to C9 (B, C). The same treatment of vascular BM whole mounts from non-diabetic eyes did not show staining for these proteins (D). Image collected and cropped by CiteAb from the following publication (dx.plos.org/10.1371/journal.pone.0189857) licensed under a CC-BY license.

Western Blot: Complement Component C9 Antibody [NBP2-15952] - Sample (30 ug of whole cell lysate) A: THP-1 7. 5% SDS PAGE gel, diluted at 1:500.

Immunocytochemistry/Immunofluorescence: Complement Component C9 Antibody [NBP2-15952] - HepG2 cells were fixed in 4% paraformaldehyde at RT for 15 min. Green: C9 stained by C9 antibody [N2C2-2], Internal diluted at 1:500. Blue: Hoechst 33342 staining.

Western Blot: Complement Component C9 Antibody [NBP2-15952] - Human plasma (30 ug) was separated by 7.5% SDS-PAGE, and the membrane was blotted with C9 antibody [N2C2-2], Internal diluted at 1:500. The HRP-conjugated anti-rabbit IgG antibody (NBP2-19301) was used to detect the primary antibody.

Western Blot: Complement Component C9 Antibody [NBP2-15952] - Rat plasma (50 ug) was separated by 10% SDS-PAGE, and the membrane was blotted with Complement Component C9 Antibody diluted at 1:1000. HRP-conjugated anti-rabbit IgG antibody was used to detect the primary antibody.

Western Blot: Complement Component C9 Antibody [NBP2-15952] - Mouse plasma (50 ug) was separated by 12% SDS-PAGE, and the membrane was blotted with Complement Component 9 antibody diluted at 1:1000. HRP-conjugated anti-rabbit IgG antibody was used to detect the primary antibody,

Immunocytochemistry/ Immunofluorescence: Complement Component C9 Antibody [NBP2-15952] - Staining of vascular BM whole mounts with antibodies to proteins detected in the proteome analysis. A generic staining of the vascular BMs was given by an antibody to the 7S domain of collagen IV $\alpha 3$ (A, C, E, F, G). Prominent staining for microvascular aneurisms was detected by staining with antibodies to C9 (B, C), Fibronectin (FN, E), ApoE (F) & PRELP (G). The same treatment of vascular BM whole mounts from non-diabetic eyes did not show staining for these proteins (D). A norrin-specific staining is shown to be generic for the entire vascular BM whole mounts (H), the signal, however, being less prominent in vascular aneurisms (arrow in H). Staining of vascular BM whole mounts from non-diabetic eyes showed a clearly weaker staining for norrin, when compared to vascular whole mounts from non-diabetic donors. Bar: 25um. Image collected & cropped by CiteAb from the following publication

(<https://dx.plos.org/10.1371/journal.pone.0189857>), licensed under a CC-BY license. Not internally tested by Novus Biologicals.
