## Images

**Immunohistochemistry: SDF4 Antibody [22550002]** - Most of the normal tissues displayed moderate to strong cytoplasmic positivity with a granular pattern. Strongest staining was observed in the gastro-intestinal tract. Malignant tissues exhibited similar staining pattern as normal cells. Many cases of testicular cancer were weakly stained. **ELISA: SDF4 Antibody [22550002]**

**ELISA:**

The affinity purified antibody was serially diluted onto an ELISA plate coated with a recombinant protein fragment.
