Product Description	
Description	Novus Biologicals Rabbit TRAF-2 Antibody - BSA Free (NB100-56172) is a polyclonal antibody validated for use in IHC, WB, ICC/IF and IP. Anti-TRAF-2 Antibody: Cited in 1 publication. All Novus Biologicals antibodies are covered by our 100% guarantee.
Host	Rabbit
Gene ID	7186
Gene Symbol	TRAF2
Species	Human, Mouse, Rat
Specificity/Sensitivity	The gene encoding TRAF2 produces, by alternative splicing, 15 different transcripts, all with introns, putatively encoding 15 different protein isoforms. These isoforms are of varying amino acid lengths. Therefore the molecular weight observed by western blot may vary, depending on the isoform expressed. Users are encouraged to use the peptide immunogen sequence information provided in the antigen section to gain additional information about the potential TRAF2 isoforms detected by the antibody.
Immunogen	A synthetic peptide corresponding to amino acids 87-106 (SSSAFPDNAARREVESLPV) of human TRAF2 was used as immunogen, GenBank no. NP_066961.2. This peptide sequence is 100% conserved in mouse and rat TRAF2. The peptide immunogen sequence is 100% conserved in multiple human TRAF2 GenBank accession numbers. These TRAF2 accession numbers are of varying amino acid (aa) lengths and include: 1. NP_066961.2 = 501 aa. 2. CAI12705.1 = 121 aa. 3. CAI12704.1 = 422 aa. 4. CAI15104.1 = 193 aa. 5. BAD96681.1 = 205 aa.
