Specificity/Sensitivity	Caspase-cleaved p73 fragments, including 55 kDa and 45 kDa, have been described (Sayan et al, 2008). The ability of a given antibody to recognize a p73 fragment will depend on whether or not the antibody epitope is contained in the fragment. It does not cross react with mouse p73 or with p53.
Immunogen	This antibody was raised against full-length human p73, and reacts with an epitope that is located on the C-terminal region of human p73 only. It does not cross react with mouse p73 or with p53.
Notes	This conjugate is made on demand. Actual recovery may vary from the stated volume of this product. The volume will be greater than or equal to the unit size stated on the datasheet.
