NBP2-24905SS

TLR7 Antibody - Azide Free

TERT Antibody Azide Fice	
Product Information	
Unit Size	0.025 mg
Concentration	1.0 mg/ml
Storage	Store at 4C short term. Aliquot and store at -20C long term. Avoid freeze-thaw cycles.
Clonality	Polyclonal
Preservative	No Preservative
Isotype	IgG
Purity	Protein G purified
Buffer	Sterile PBS
Product Description	
Host	Rabbit
Gene ID	51284
Gene Symbol	TLR7
Species	Human, Mouse, Rat
Immunogen	This antibody was developed against KLH-conjugated synthetic peptide corresponding to amino acids 706-749 of human TLR7; GenBank no. gb AAF78035.1 AF245702_1. It will cross-react with mouse TLR7. In human Ramos cells, additional bands are seen.
Product Application Details	
Applications	Western Blot, Flow Cytometry, Immunocytochemistry/ Immunofluorescence, Immunohistochemistry, Immunohistochemistry-Paraffin, Immunoprecipitation
Recommended Dilutions	Western Blot 1-3 ug/ml, Flow Cytometry 1ul/1 million cells, Immunohistochemistry, Immunocytochemistry/ Immunofluorescence 1:10-1:500, Immunoprecipitation reported in scientific literature (PMID 17452530), Immunohistochemistry-Paraffin 1:10-1:500, Immunohistochemistry-Frozen 1:10-1:500
Images	
Western Blot: TLR7 Antibody TLR7 in RAW cell lysate usin	- Azide Free [NBP2-24905] - analysis of g this antibody.

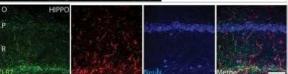

Immunocytochemistry/Immunofluorescence: TLR7 Antibody - Azide Free [NBP2-24905] - Immunolocalization of TLR7 (A) and glial fibrillary acidic protein (GFAP) (B) in murine myenteric plexus. Most of the GFAP positive cells were also positive for TLR7 in the merged image (C, yellow staining). (Courtesy of Barajon I, et al., Journal of Histochemistry and Cytochemistry, 57(11): 1013-;1023, 2009.) Image using the standard format of this product.

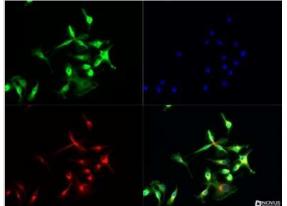

Immunohistochemistry: TLR7 Antibody - Azide Free [NBP2-24905] - The expression of TLR-7 in the hippocampal brain region. The immunofluorescence of TLR7 recognized by Alexa 488, green. GFAP recognized by Alexa 594, red. NEUN recognized by Alexa 633, (blue) and merged image in the hippocampal region. NeuN and GFAP were applied to show the distribution of TLR7 within neuronal and supportive tissue populations. Scale bar 80 um. Image collected and cropped by CiteAb from the following publication

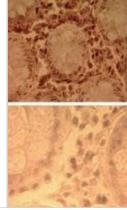

(//doi.org/10.1371/journal.pone.0222818) licensed under a CC-BY license. Image using the standard format of this product.

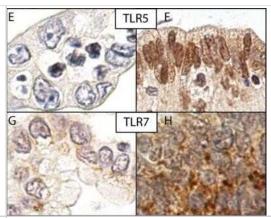

Immunocytochemistry/Immunofluorescence: TLR7 Antibody - Azide Free [NBP2-24905] - TLR7 antibody was tested in Raw 246.7 cells with Dylight 488 (green). Nuclei and alpha-tubulin were counterstained with DAPI (blue) and Dylight 550 (red). Image objective 40x. An antibody dilution of 1:10 was used.

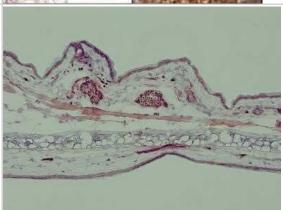

Immunohistochemistry-Paraffin: TLR7 Antibody - Azide Free [NBP2-24905] - Analysis of human colon tissue using NBP2-24905 (top) and an isotype control (bottom) at 5 ug/ml.

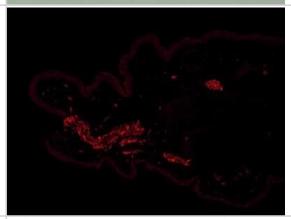

Immunohistochemistry: TLR7 Antibody - Azide Free [NBP2-24905] - Expression of the TLRs 5 and 7 were evaluated in the PDAC tissue by their staining intensity using TLR5 antibody (NBP2-24787) and TLR7 antibody (NBP2-24906). Note negative staining in E and G; positive staining in F and H. For TLR7 immunopositivity was detectable in the cytoplasm with no notable membranous or nuclear positivity. TLR5 showed distinctive nuclear positivity, and detectable positivity in the cytoplasm in some samples. Image collected and cropped by CiteAb from the following publication (//doi.org/10.1371/journal.pone.0219245) licensed under a CC-BY license. Image using the standard format of this product.

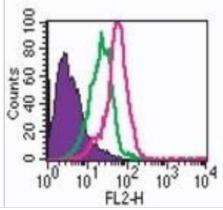

Immunohistochemistry-Frozen: TLR7 Antibody - Azide Free [NBP2-24905] - Analysis of frozen mouse ear skin tissue using anti-TLR7 antibody. Image from verified customer review. Image using the standard format of this product.

Immunohistochemistry-Frozen: TLR7 Antibody - Azide Free [NBP2-24905] - Analysis of TLR7 in acetone-fixed, frozen mouse ear skin section using anti-TLR7 antibody. Image from verified customer review. Image using the standard format of this product.

Flow Cytometry: TLR7 Antibody - Azide Free [NBP2-24905] - Intracellular staining by analysis of TLR7 in human PBMC using this antibody at 0.5 ug/ml. Shaded histogram is cells alone, green is rabbit IgG isotype control (NBP2-24891), red represents anti-TLR7 antibody. NBP2-30343PE was used for secondary.
