264-0500**Abpure (TM) TCS Antibody Purification Kit**

Product Information	
Unit Size	3 Tests
Concentration	Concentration is not relevant for this product. Please see the protocols for proper use of this product.
Storage	Store at 4°C.
Product Description	
Description	<p>Protein A has a high affinity for the Fc regions of IgG molecules from a variety of species. AbPure Protein A resin is prepared by coupling purified Protein A to agarose beads. It can therefore be used to purify IgG fractions from hybridoma supernatants.</p> <p>The method involves capture of the antibody on the AbPure resin and the removal of unwanted substances using a simple wash procedure. The antibody is then eluted and neutralized. The kit can be used in its rapid version by spin-purification in a centrifuge, or by gravity-flow purification. The AbPure TCS System is fully compatible with the InnovaCoat GOLD and the LATEX conjugation kits (available separately), which allow the purified antibody to be conjugated rapidly.</p>
Kit Components	1 or 3 bottles of AbPure TCS Protein A resin, 1 or 3 spin purification columns with caps and stoppers, 1 bottle of 10x AbPure Binding Buffer, 1 bottle of AbPure Wash Buffer, 1 bottle of AbPure Elution Buffer, 1 bottle of AbPure Neutralization Buffer, 1 bottle of AbPure Preservative, 4 or 12 15ml collection tubes, 1 or 3 concentrator spin columns
Notes	<p>This product is manufactured by Abcam and distributed by Novus Biologicals.</p> <p>This product is for research use only and is not approved for use in humans or in clinical diagnosis. This product is guaranteed for 1 year from date of receipt and this statement overrides any mentioned guarantee period on the limitations section of this products datasheet. Please contact technical@novusbio.com with questions.</p>
Product Application Details	
Application Notes	The antibody to be purified should be in 10 to 50 ml of tissue culture supernatant (TCS). Up to 5 mg of antibody can be purified in each run.
