CTS013-NOV**Antigen Retrieval Reagent-Basic****Product Information**

Unit Size	50 ml
Concentration	Please see the protocols for proper use of this product. If no protocol is available, contact technical services for assistance.
Storage	Store at room temperature.

Product Description

Description	We offer reagents to promote epitope availability and enhance immunoreactivity. Antigen Retrieval Reagent-Basic is an antigen retrieval system that utilizes heat-induced recovery of cell and tissue antigens. The Basic solution included in the kit may also affect tissue morphology. The optimal antigen unmasking condition is a function of temperature (90 - 100C) and incubation time (up to 30 minutes), and should be established by each individual investigator.

Images

Immunohistochemistry-Paraffin: Antigen Retrieval Reagent-Basic [CTS013-NOV] - Neuroplastin 65 was detected in human cerebellar tissue using 3 ug/mL goat anti-human/mouse Neuroplastin 65 polyclonal antibody. Tissue was pretreated with Antigen Retrieval Reagent-Basic (Catalog # CTS013-NOV). Tissue was stained using Anti-Goat HRP-DAB Cell & Tissue Staining Kit (brown, Catalog # CTS008-NOV) and counterstained with hematoxylin (blue).
