Storage Store at 4C in the dark. Clonality Monoclonal Clone 143-30 Preservative 0.05% Sodium Azide Isotype IgG1 Kappa Conjugate Alexa Fluor 488 Purity Protein A or G purified Buffer 50mM Sodium Borate Product Description Host Mouse Gene ID 1604 Gene Symbol CD55 Species Human Specificity/Sensitivity Widely expressed on cells throughout the body including leukcoytes, erythrocytes, epithelium, endothelium, and fibroblasts. It is a Glycosyl phosphatidylinostical anchored (GP1-anchored) member of the membrane bound complement regulatory proteins that inhibit autologous complement cascade activation. It prevents the amplification steps of the complement cascade by interfering with the assembly of the C3-convertases, C4b2a and C3bBb, and the C5-convertase, C4b2ash and C3bBbb. CD55 also serves as receptor for CD97 and for echovirus and Coxsackie B virus. The monoclonal antibody 143-30 may be used as marker for paroxysmal nocturnal hemoglobinuria (PNH). Notes Alexa Fluor (R) products are provided under an intellectual property license from Life Technologies Corporation. The purchase of this product conveys to the buyer the non-transferable right to use the purchased product and components of the product only in research conducted by the buyer (whether the buyer is an academic or for-profit entity). The salse of this product and components of the product on its components, or any materials made using the product or its components, or any materials made using the product or its components, or any materials made using the product or its components, or any materials made using the product or its components, or any materials made using the product or for therapeutic, diagnostic or prophylactic purposes or (iv) for resale, regardless of whether they are resold for use in research. For information on purchand. Actual recovery may vary from the stated volume of this product. The	Unit Size	0.1 ml
