

Product Datasheet

Aurora B Antibody (6G2) - BSA Free NBP2-50054

Unit Size: 0.1 ml

Store at 4C short term. Aliquot and store at -20C long term. Avoid freeze-thaw cycles.

NBP2-50054

Aurora B Antibody (6G2) - BSA Free

Product Information	
Unit Size	0.1 ml
Concentration	1 mg/ml
Storage	Store at 4C short term. Aliquot and store at -20C long term. Avoid freeze-thaw cycles.
Clonality	Monoclonal
Clone	6G2
Preservative	0.035% Sodium Azide
Isotype	IgG1
Purity	Immunogen affinity purified
Buffer	50% PBS, 50% glycerol
Target Molecular Weight	38 kDa

Product Description	
Description	Novus Biologicals Mouse Aurora B Antibody (6G2) - BSA Free (NBP2-50054) is a monoclonal antibody validated for use in IHC, WB and ICC/IF. All Novus Biologicals antibodies are covered by our 100% guarantee.
Host	Mouse
Gene ID	9212
Gene Symbol	AURKB
Species	Human, Canine, Equine
Specificity/Sensitivity	This antibody does not cross-react with Aurora A or Aurora C.
Immunogen	Recombinant full length human Aurora B. [UniProt# Q96GD4]

Product Application Details	
Applications	Western Blot, Immunocytochemistry/ Immunofluorescence, Immunohistochemistry
Recommended Dilutions	Western Blot 1:1000, Immunohistochemistry 1:1000 - 1:2000, Immunocytochemistry/ Immunofluorescence 1:1000 - 1:2000

Images

Western Blot: Aurora B Antibody (6G2) [NBP2-50054] - Left: Analysis of HeLa cells treated with 100ng/ml nocodazole for 18 hours was probed with NBP2-50054. Nocodazole is a microtubule polymerization inhibitor which induces cells to halt at the G2/M phase and also induces Aurora B expression. NBP2-50054 binds strongly to Aurora B at 38 kDa. Right: Blots of recombinant human Aurora A, B and C were probed with NBP2-50054.

Immunocytochemistry/Immunofluorescence: Aurora B Antibody (6G2) [NBP2-50054] - Analysis of HeLa cells stained with mouse mAb to aurora B kinase, NBP2-50054, dilution 1:1,000 in red, and costained with chicken pAb to vimentin, dilution 1:10,000 in green. Blue is DAPI staining of nuclear DNA. NBP2-50054 antibody produces strong staining associated with chromosomes in prophase (A), the centromere in prometaphase and metaphase (B), the central mitotic spindle in anaphase (C), and midbodies between the two daughter cells during telophase and beyond (D). The vimentin antibody stains the intermediate filament network in these cells.

Immunocytochemistry/Immunofluorescence: Aurora B Antibody (6G2) [NBP2-50054] - HeLa cell cultures were stained with NBP2-50054 (green). Localization of Aurora B is cell cycle phase dependent. First, Aurora B staining was seen in chromosome arm in cells in prophase (green small dots). During anaphase, Aurora B localized in midzone and then concentrated in midbodies between the two daughter cells during telophase. It is therefore a useful marker of midbodies and dividing cells. Cells were counterstained with chicken polyclonal antibody to Vimentin (NB300-223, red). Blue is a DNA stain.
