Images

Western Blot: HA Tag Antibody (C.15200190) [NBP2-59172] - Whole cell extracts from HEK293 cells transfected with an HA-tagged expression vector using the antibody directed against HA at 1:1,000. Figure shows the results for untransfected cells, used as a negative control (lane 1) and for cells transfected with a HA-tagged protein (lane 2). The MW marker (in kDa) is shown on the left. A single band is clearly visible in lane 2, but absent in lane 1 showing the high specificity of the HA antibody.
