VL001-200-NOV**VisULite ECL Western Blotting Substrate**

Product Information	
Unit Size	200 ml
Concentration	Please see the protocols for proper use of this product. If no protocol is available, contact technical services for assistance.
Storage	Store at 4C in the dark.
Product Description	
Description	<p>VisULite ECL Western Blotting Substrate is a ready-to-use high sensitivity Enhanced Chemiluminescent (ECL) substrate. VisULite ECL Western Blotting Substrate is compatible with PVDF and nitrocellulose membranes and various blotting buffers. Detection and analysis may be done using X-ray film or CCD imaging systems. VisULite ECL Western Blotting Substrate is for Western blots utilizing horseradish peroxidase (HRP)-conjugated detection components. Because VisULite ECL Western Blotting Substrate is a highly sensitive substrate, optimization of primary and secondary antibodies may be required to generate consistently reproducible results with strong signals and low backgrounds.</p> <p>ADVANTAGES Single Component-- no mixing required. Highly sensitive with excellent signal duration.</p>
Kit Components	High Sensitivity Peroxidase Substrate
Product Application Details	
Applications	Western Blot
Recommended Dilutions	Western Blot
