## 325-0005

Lightning-Link (R) Rapid DyLight 633 Antibody Labeling Kit

Product Information Unit Size 100 ug   Concentration Concentration is not relevant for this product. Please see the protocols for proper use of this product.   Storage Store at -20C.   Conjugate DyLight 633   Product Description Lightning-Link Rapid is an innovative technology that enables direct labeling of proteins, peptides or other biomolecules for use in R&D applications, drug discovery and the development of diagnostic kits (See protocol for further information).   The easy-to-use, one step procedure allows researchers to covalently label biomolecules with only 30 seconds hands-on time; furthermore conjugates are ready to use in less than twenty minutes.   The researcher simply pipettes the biomolecule into a vial of hypohilized mixture containing the label of interest and incubates (for more details please watch the video below).   FeaturesBenefitsQuick and easy to useSave time, no special knowledge requiredNo separation steps 100% recovery - no antibody/protein lossCan be used in a wide range of applicationsFlexibleFreeze diredShips at ambient temperature, long shell-life/Ulty scalable (10 up 1 g or more) lasy transfer from R&D to manufacturingStringently OC testedConsistent high quality, excellen tbatch-orbetcher product/bilityLarge number of labels available   DyLight 633 provides red fluorescence for a wide array of fluorescence labeling-based applications. It has a strong absorption at 628nm, high fluorescence labeling-based applications. It has a strong absorption at 628nm, high fluorescence labeling-based applications. It has a strong absorption at 628nm, high fluorescence labeling-based applications. It has a strong absorption	99()

**Product Application Details** 

www.novusbio.com

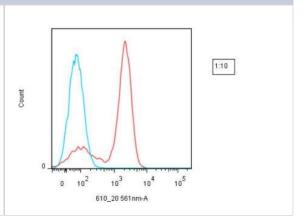

#### **Application Notes**

By circumventing the desalting or dialysis steps that commonly interrupt traditional antibody conjugation procedures, LightningLink technology can be used to label both small (e.g. 10 ug) and large quantities of primary antibodies with ease. Batch-to-batch variation upon scale up is minimal as the process is so simple, and recoveries are always 100%.

#### Images

Lightning-Link® Rapid DyLight 633 Antibody Labeling Kit - Mouse antihuman CD8 was conjugated with DyLight633 using an Expedeon Rapid Lightning-Link kit. The conjugated antibody was then used to stain human peripheral blood lymphocytes, followed by analysis with flow cytometry. (Blue line - negative control; red line - positive staining).
