| Species                     | Mammal                                                                                                                                                                                                                                                                                                                                          |
| Reactivity Notes            | Please note that this antibody is reactive to Mouse and derived from the same host, Mouse. Mouse-On-Mouse blocking reagent may be needed for IHC and ICC experiments to reduce high background signal. You can find these reagents under catalog numbers PK-2200-NB and MP-2400-NB. Please contact Technical Support if you have any questions. |
| Marker                      | Epithelial Marker                                                                                                                                                                                                                                                                                                                               |
| Specificity/Sensitivity     | The antibody C-04 reacts with Cytokeratin 18 (45 kDa), a member of intermediate filaments subfamily represented in epithelial tissues.                                                                                                                                                                                                          |
| Immunogen                   | Cytoskeleton preparation of epidermal carcinoma cell line A431.                                                                                                                                                                                                                                                                                 |
