| Species                     | Human, Mouse, Rat, Porcine, Bovine                                                                                                                                                                                                                                                                                                              |
| Reactivity Notes            | Please note that this antibody is reactive to Mouse and derived from the same host, Mouse. Mouse-On-Mouse blocking reagent may be needed for IHC and ICC experiments to reduce high background signal. You can find these reagents under catalog numbers PK-2200-NB and MP-2400-NB. Please contact Technical Support if you have any questions. |
| Marker                      | Clathrin-coated Vesicle Marker                                                                                                                                                                                                                                                                                                                  |
| Specificity/Sensitivity     | The antibody BF-06 recognizes clathrin heavy chain, an ubiquitously expressed 180 kDa protein involved in receptor-mediated endocytosis.                                                                                                                                                                                                        |
| Immunogen                   | The antibody BF-06 recognizes clathrin heavy chain, an ubiquitously expressed 180 kDa protein involved in receptor-mediated endocytosis.                                                                                                                                                                                                        |
