#### NBP2-34551AF532

EPX Antibody (AHE-1) [Alexa Fluor® 532]

| Product Information     |  |
|-------------------------|--|
| Unit Size               | 0.1 ml   |
| Concentration           | Please see the vial label for concentration. If unlisted please contact technical services.  |
| Storage                 | Store at 4C in the dark.   |
| Clonality               | Monoclonal   |
| Clone                   | AHE-1  |
| Preservative            | 0.05% Sodium Azide   |
| Isotype                 | IgG1 Kappa   |
| Conjugate               | Alexa Fluor 532  |
| Purity                  | Protein A or G purified  |
| Buffer                  | 50mM Sodium Borate   |
| Product Description     |  |
| Host                    | Mouse  |
| Gene ID                 | 8288   |
| Gene Symbol             | EPX  |
| Species                 | Human  |
| Reactivity Notes        | Others not known.  |
| Specificity/Sensitivity | Peripheral blood granulocytes are classified into neutrophils, basophils and<br>eosinophils according to the staining characteristics of their cytoplasmic<br>granules. Granule proteins are released by physiologic and pharmacologic<br>stimuli and play important roles in both normal and pathological host immune<br>responses. Eosinophil major basic protein and eosinophil peroxidase (EPX) are<br>granule proteins specific to the eosinophil. AHE-1 recognizes human EPX, a<br>granule protein specific to eosinophils. It does not cross-react with eosinophil<br>major basic protein, elastase, cathepsin G, esterase N, thrombin, plasmin,<br>kallikrein, lactoferrin, or transferrin. This monoclonal antibody stains eosinophils<br>only and does not stain other peripheral blood cells, including platelets,<br>neutrophils, monocytes, lymphocytes or red blood cells. Human EPX gene<br>product can form a tetramer of two light chains and two heavy chains. Other<br>peroxidase family members include myeloperoxidase (MPO), lactoperoxidase<br>(LPO), and thyroid peroxidase (TPO). |
| Immunogen               | Human eosinophils from a patient with hypereosinophilic syndrome (Uniprot: P11678)   |

|                              | Alexa Fluor (R) products are provided under an intellectual property license from<br>Life Technologies Corporation. The purchase of this product conveys to the<br>buyer the non-transferable right to use the purchased product and components<br>of the product only in research conducted by the buyer (whether the buyer is an<br>academic or for-profit entity). The sale of this product is expressly conditioned on<br>the buyer not using the product or its components, or any materials made using<br>the product or its components, in any activity to generate revenue, which may<br>include, but is not limited to use of the product or its components: (i) in<br>manufacturing; (ii) to provide a service, information, or data in return for<br>payment; (iii) for therapeutic, diagnostic or prophylactic purposes; or (iv) for<br>resale, regardless of whether they are resold for use in research. For information<br>on purchasing a license to this product for purposes other than as described<br>above, contact Life Technologies Corporation, 5791 Van Allen Way, Carlsbad,<br>CA 92008 USA or outlicensing@lifetech.com. This conjugate is made on<br>demand. Actual recovery may vary from the stated volume of this product. The<br>volume will be greater than or equal to the unit size stated on the datasheet. |
|------------------------------|---|
| Product Application Details  |   |
| Applications                 | ELISA, CyTOF-ready  |
| <b>Recommended Dilutions</b> | ELISA, CyTOF-ready  |
| Application Notes            | Optimal dilution of this antibody should be experimentally determined.  |
