NBP2-62162

Human, Mouse, Rat RelA/NFkB p65 ELISA Kit (Colorimetric)

Product Information	
Unit Size	1 Kit
Concentration	Concentration is not relevant for this product. Please see the protocols for proper use of this product.
Storage	Store at 4°C.
Product Description	
Description	The NFkB p65 ELISA kit allows the accurate measurement of total and phosphorylated human NFkB p65 in cell lysates. This ELISA uses the traditional sandwich ELISA format, but with a major difference: both the sample and the assay reagents can be added to the assay microplate at the same time. Since the antibodies are not precoated in the wells, several different targets can be analyzed simultaneously in the same plate in different wells. With this kit a mixture of capture and detection antibodies against either phosphorylated or total NFkB can be added to the sample lysate, thus enabling their detection with a simple 1-hour protocol.
Gene ID	5970
Gene Symbol	RELA
Species	Human, Mouse, Rat
Kit Components	Microtiter plate, cell lysis buffer, 10X wash buffer, detection reagent, stop solution, plate sealer, capture antibody, detector antibody, positive control lysate
Standard Curve Range	N/A
Sensitivity	N/A
Inter Assay	N/A
Intra Assay	N/A
Assay Type	Sandwich ELISA
Spiking Recovery	N/A
Suitable Sample Type	Human, mouse, and rat cell lysates
Sample Volume	50 uL
Product Application Details	
Applications	ELISA
Recommended Dilutions	ELISA
