Images

Western Blot: PHF8 Antibody [NBP2-62797] - E14TG2A mouse embryonic stem cells were transfected with a conditional allele of PHF8. Nuclear extracts from wild type cells (WT) and from 2 clones (F1, B8) with an active and a targeted allele (F1ko, B8ko), respectively, were analysed using the antibody against PHF8.

ELISA: PHF8 Antibody [NBP2-62797] - To determine the titer of the antibody, an analysis was performed using a serial dilution of the antibody directed against human PHF8, crude serum and Flow Through in antigen coated wells. By plotting the absorbance against the antibody dilution, the titer of the antibody was estimated to be 1:6,500.
