## **Product Datasheet**

### Goat anti-Canine IgM Fc Secondary Antibody [HRP] NBP2-69670

Unit Size: 1 ml

Store at 4C short term. Aliquot and store at -20C long term. Avoid freeze-thaw cycles.

#### NBP2-69670

Goat anti-Canine IgM Fc Secondary Antibody [HRP]

Product Information   Unit Size 1 ml   Concentration LYOPH mg/ml   Storage Store at 4C short term. Aliquot and store at -20C long term. Avoid freeze-thaw cycles.   Clonality Polyclonal   Preservative No Preservative   Reconstitution Instructions Reconstitute by by adding 1 ml sterile distilled water, spun down to remove insoluble particles, divided into small aliquots, frozen and stored at or below - 20C.   Conjugate HRP   Purity Ion exchange chromatography   Buffer Lyophilized from PBS (pH 7.2)   Product Description The lyophilized conjugate is shipped at ambient temperature and may be store at 4C; prolonged storage at or below -20C. Prior to use, an aliquot is thawed slowly at ambient temperature, spun down again and used to prepare working dilutions by adding strile phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided. Working dilutions should be stored at 4C; not refrozen, and preferably used the same day. If a slight precipitation occurs upon storage, this should be removed by centrifugation. It will not affect the performance of the immunoconjugate.   Host Goat   Species Canine   Reactivity Notes Inter-species cross-reactivity is a normal feature of antibodies to immunoglobulins, since Ig of different species frequently share antigenic determinants. Cross-reactivity of this antiserum has not been tested in detail.

immunoglobulins, since Ig of different species frequently share antigenic determinants. Cross-reactivity of this antiserum has not been tested in detail.Specificity/SensitivityThe reactivity of the antiserum is directed to the Fc subunit of the IgM molecule
Ig protein in dog serum, as tested by immunoelectrophoresis and double radial immunodiffusion.
ImmunogenPurified normal IgM isolated from pooled dog serum. Freund's complete adjuvation is used in the first step of the immunization procedure.
Product Application Details
Applications   Western Blot, Dot Blot, ELISA, Immunohistochemistry-Paraffin, Immunocytochemistry
Recommended Dilutions Western Blot, ELISA, Immunohistochemistry-Paraffin, Dot Blot, Immunocytochemistry
