NXA05160**RunBlue Prestained Molecular-Weight Marker- Dual colour**

Product Information	
Unit Size	600 ul
Concentration	Please see the protocols for proper use of this product. If no protocol is available, contact technical services for assistance.
Storage	Store at 4C short term. Aliquot and store at -20C long term. Avoid freeze-thaw cycles.
Product Description	
Description	The RunBlue prestained protein markers for SDS PAGE contains 10 recombinant proteins ranging in size from 7.6 kDa to 195 kDa. For easy visualization the 28 kDa and 71 kDa marker have been dyed orange, the other eight markers are blue. The purity and band sharpness mean the markers can be used for visualizing the separation while running the gel, checking transfer effectiveness of your western blot, or as a routine marker in place of other unstained markers.
Notes	This product is manufactured by Expedeon Inc. and distributed by Novus Biologicals.
Product Application Details	
Applications	Western Blot
Recommended Dilutions	Western Blot
