| Species                     | Equine                                                                                                                                                                                                                                                                                                                                |
| Specificity/Sensitivity     | Detects equine IL-6 in direct ELISAs and Western blots. In direct ELISAs and Western blots, approximately 50% cross-reactivity with recombinant human IL-6, recombinant porcine IL-6 and recombinant canine IL-6 is observed and approximately 20% cross-reactivity with recombinant mouse IL-6 and recombinant rat IL-6 is observed. |
| Immunogen                   | <i>E. coli</i> -derived recombinant equine IL-6<br>Phe26-Met208<br>Accession # Q95181                                                                                                                                                                                                                                                 |
