## CD300f/LMIR3/CD300LF Antibody [CoraFluor™ 1] AF2774CL1

Unit Size: 0.1 ml

Store at 4C in the dark. Do not freeze.

| Description             | <p>CoraFluor(TM) 1 is a high performance terbium-based TR-FRET (Time-Resolved Fluorescence Resonance Energy Transfer) or TRF (Time-Resolved Fluorescence) donor for high throughput assay development. CoraFluor(TM) 1 absorbs UV light at approximately 340 nm, and emits at approximately 490 nm, 545 nm, 585 nm and 620 nm. It is compatible with common acceptor dyes that absorb at the emission wavelengths of CoraFluor(TM) 1. CoraFluor(TM) 1 can be used for the development of robust and scalable TR-FRET binding assays such as target engagement, ternary complex, protein-protein interaction and protein quantification assays.</p> <p><a href="#">CoraFluor(TM) 1, amine reactive</a></p> <p><a href="#">CoraFluor(TM) 1, thiol reactive</a></p> <p>For more information, please see our <a href="#">CoraFluor(TM) TR-FRET technology flyer</a>.</p> |

| Specificity/Sensitivity | Detects human CD300f/LMIR3 in direct ELISAs and Western blots. In direct ELISAs, approximately 20% cross-reactivity with recombinant human (rh) LMIR5 and rhLMIR4 is observed.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

US patent 2022/0025254                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Product Application Details |                                                                                 |
|-----------------------------|---------------------------------------------------------------------------------|
| Applications                | Western Blot, Flow Cytometry, Immunoprecipitation, Cell Culture, Neutralization |
| Recommended Dilutions       | Western Blot, Flow Cytometry, Immunoprecipitation, Neutralization, Cell Culture |
| Application Notes           | Optimal dilution of this antibody should be experimentally determined.          |
