| Host                        | Goat                                                                                                                                                                                                                                                                  |
| Gene ID                     | 4794                                                                                                                                                                                                                                                                  |
| Gene Symbol                 | NFKBIE                                                                                                                                                                                                                                                                |
| Species                     | Human                                                                                                                                                                                                                                                                 |
| Specificity/Sensitivity     | Detects human I $\kappa$ B- $\epsilon$ in direct ELISAs. In direct ELISAs, approximately 40% cross-reactivity with recombinant mouse I $\kappa$ B- $\epsilon$ is observed and less than 1% cross-reactivity with recombinant human I $\kappa$ B- $\beta$ is observed. |
| Immunogen                   | <i>E. coli</i> -derived recombinant human I $\kappa$ B- $\epsilon$<br>Ser141-Asp500<br>Accession # O00221                                                                                                                                                             |
