| Species                     | Rat                                                                                                                                                                                                                                                                                                                                                                        |
| Specificity/Sensitivity     | Detects rat CD25/IL-2 R $\alpha$ in direct ELISAs and Western blots. In direct ELISAs and Western blots, approximately 20% cross-reactivity with recombinant mouse CD25/IL-2 R $\alpha$ is observed, approximately 10% cross-reactivity with recombinant human (rh) CD25/IL-2 R $\alpha$ is observed, and less than 5% cross-reactivity with rhIL-2 R $\beta$ is observed. |
| Immunogen                   | Chinese hamster ovary cell line CHO-derived recombinant rat CD25/IL-2 R $\alpha$ Glu22-Gln235<br>Accession # P26897                                                                                                                                                                                                                                                        |
