| <b>Specificity/Sensitivity</b>     | Detects rat CXCL3/CINC-2 $\alpha$ / $\beta$ in direct ELISAs and Western blots. In direct ELISAs, almost 100% cross-reactivity with recombinant rat (rr) CINC-2 $\alpha$ is observed, approximately 50% cross-reactivity with recombinant mouse (rm) MIP-2 is observed, 35% cross-reactivity with rmKC is observed, 15% cross-reactivity with rrCINC-1 is observed, and 10% cross-reactivity with recombinant human (rh) IL-8, rhGRO $\alpha$ , rhGRO $\beta$ , and rhGRO $\gamma$ is observed. |
| <b>Immunogen</b>                   | <i>E. coli</i> -derived recombinant rat CXCL3/CINC-2 $\alpha$ / $\beta$<br>Arg33-Leu100<br>Accession # NP_612531                                                                                                                                                                                                                                                                                                                                                                                |
| <b>Product Application Details</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Applications</b>                | Western Blot, Neutralization                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Recommended Dilutions</b>       | Western Blot, Neutralization                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Application Notes</b>           | Optimal dilution of this antibody should be experimentally determined.                                                                                                                                                                                                                                                                                                                                                                                                                          |
