| Host                        | Rat                                                                                                                                                                                                                                                                                         |
| Gene ID                     | 53832                                                                                                                                                                                                                                                                                       |
| Gene Symbol                 | Il22ra2                                                                                                                                                                                                                                                                                     |
| Species                     | Mouse                                                                                                                                                                                                                                                                                       |
| Specificity/Sensitivity     | Detect mouse IL-20 R $\alpha$ in direct ELISAs and Western blots. In direct ELISAs, this antibody does not cross-react with recombinant mouse IFN $\gamma$ R1, recombinant human (rh) IFN- $\gamma$ R1, rhIFN- $\gamma$ R2, rhIL-10 R $\beta$ , rhIL-20 R $\alpha$ , or rhIL-20 R $\beta$ . |
| Immunogen                   | Mouse myeloma cell line NS0-derived recombinant mouse IL-20 R $\alpha$ Val33-Lys253<br>Accession # Q6PHB0                                                                                                                                                                                   |
