| Gene Symbol             | ANXA1                                                                                                                                                                                                                                                                                                                                                |
| Species                 | Human, Mouse, Rat                                                                                                                                                                                                                                                                                                                                    |
| Specificity/Sensitivity | Detects human Annexin A1 in direct ELISAs and human, mouse, and rat Annexin A1 in Western blots. In direct ELISAs, approximately 25%–50% cross-reactivity with recombinant human (rh) Annexin A2 is observed and no cross-reactivity with rhAnnexin A3, A6, or A11 is observed. In Western blots, no cross-reactivity with rhAnnexin A6 is observed. |
| Immunogen               | <i>E. coli</i> -derived recombinant human Annexin A1<br>Met1-Asn346<br>Accession # P04083                                                                                                                                                                                                                                                            |

| Product Application Details |                                                                        |
|-----------------------------|------------------------------------------------------------------------|
| Applications                | Western Blot, Knockout Validated                                       |
| Recommended Dilutions       | Western Blot, Knockout Validated                                       |
| Application Notes           | Optimal dilution of this antibody should be experimentally determined. |
