| Gene ID                     | 50615                                                                                                                                                                   |
| Gene Symbol                 | IL21R                                                                                                                                                                   |
| Species                     | Human                                                                                                                                                                   |
| Specificity/Sensitivity     | Detects human IL-21 R in direct ELISAs. In direct ELISAs, this antibody does not cross-react with recombinant human (rh)IL $\alpha$ 2 R $\beta$ or rmlIL $\alpha$ 21 R. |
| Immunogen                   | <i>S. frugiperda</i> insect ovarian cell line Sf 21-derived recombinant human IL-21 R Cys20-Pro236<br>Accession # Q9HBE5                                                |
| Notes                       | Sold under license from the Howard Hughes Medical Institute, Janelia Research Campus.                                                                                   |
| Product Application Details |                                                                                                                                                                         |
| Applications                | Flow Cytometry, CyTOF-ready                                                                                                                                             |
| Recommended Dilutions       | Flow Cytometry, CyTOF-ready                                                                                                                                             |
| Application Notes           | Optimal dilution of this antibody should be experimentally determined.                                                                                                  |
