FL-1201-NB**Griffonia Simplicifolia Lectin I (GSL I) Isolectin B4 Native Protein**

Product Information	
Unit Size	0.5 mg
Concentration	Please see the vial label for concentration. If unlisted please contact technical services.
Storage	Store at 4C in the dark.
Preservative	0.08% Sodium Azide
Conjugate	FITC
Purity	Affinity purified
Buffer	10 mM HEPES (pH 7.5), 0.15 M NaCl, 0.1 mM Ca ²⁺
Target Molecular Weight	114 kDa
Product Description	
Description	<p>A biologically active protein corresponding to Griffonia Simplicifolia Lectin I (GSL I) Isolectin B4.</p> <p>Source: <i>Griffonia (Bandeiraea) simplicifolia</i> seeds</p> <p>GSL I-B4 isolectin contains only the B subunits. It is a useful marker for endothelial cells from nonprimates such as mouse, rat, rabbit, and goat as well as a marker for non-peptidergic unmyelinated primary afferent neurons. This "B"-rich lectin preferentially agglutinates blood group B cells and is specific for α-galactose residues.</p> <p>Fluorescein labeled GSL I-B4 has an appropriate number of fluorochromes bound to provide the optimum staining characteristics for this lectin. This conjugate is supplied essentially free of unconjugated fluorescein and is preserved with sodium azide. Excitation maximum = 495 nm; emission maximum = 515 nm. Color = green.</p>
Species	Plant
Details of Functionality	This "B"-rich lectin preferentially agglutinates blood group B cells and is specific for α-galactose residues.
Notes	This product is manufactured by Vector Laboratories and distributed by Novus Biologicals.
Product Application Details	
Applications	Immunocytochemistry/ Immunofluorescence, Bioactivity
Recommended Dilutions	Immunocytochemistry/ Immunofluorescence, Bioactivity
Application Notes	For most applications, the recommended concentration range is 5 - 20 ug/mL. For immunofluorescence applications, it is recommended that sections be mounted in VECTASHIELD(R) HardSet(TM) Antifade Mounting Medium (H-1400-NB) or VECTASHIELD(R) HardSet(TM) Antifade Mounting Medium with DAPI (H-1500-NB).
