Product Application Details	
Applications	Western Blot
Recommended Dilutions	Western Blot 1:100-1:2000
Application Notes	This antibody has been tested in Western blot. The predicted MW is 48 kDa; however the protein runs above 50 kDa on gels and can form dimers. No other applications have been tested. Recommended Starting Dilution:* Western blot: 1:500-1:1,000 *The investigator should determine the optimal working dilution for a specific application. The observed molecular weight of the protein may vary from the listed predicted molecular weight due to post translational modifications, post translation cleavages, relative charges, and other experimental factors.
