| Species                     | Human                                                                                                                                                                                                          |
| Reactivity Notes            | 0                                                                                                                                                                                                              |
| Immunogen                   | Antibody was raised against a 17 amino acid synthetic peptide from near the amino terminus of human ADAP. The immunogen is located within amino acids 60 - 110 of ADAP. Amino Acid Sequence: SEEKPDKEPKPPFLKPT |
| Product Application Details |                                                                                                                                                                                                                |
| Applications                | Western Blot, ELISA, Immunocytochemistry/Immunofluorescence                                                                                                                                                    |
| Recommended Dilutions       | Western Blot, ELISA, Immunocytochemistry/Immunofluorescence                                                                                                                                                    |
| Application Notes           | Optimal dilution of this antibody should be experimentally determined.                                                                                                                                         |
