| Species                     | Human, Mouse                                                                                                                                                                                                   |
| Reactivity Notes            | 0                                                                                                                                                                                                              |
| Immunogen                   | Antibody was raised against a 15 amino acid synthetic peptide near the carboxy terminus of human NAT11. The immunogen is located within the last 50 amino acids of NAT11. Amino Acid Sequence: YEILSRRTKFGDSHH |
| Notes                       | Sold under license from the Howard Hughes Medical Institute, Janelia Research Campus.                                                                                                                          |
| Product Application Details |                                                                                                                                                                                                                |
| Applications                | Western Blot, ELISA, Immunocytochemistry/Immunofluorescence, Immunohistochemistry, Immunohistochemistry-Paraffin                                                                                               |
| Recommended Dilutions       | Western Blot, ELISA, Immunohistochemistry, Immunocytochemistry/Immunofluorescence, Immunohistochemistry-Paraffin                                                                                               |
| Application Notes           | Optimal dilution of this antibody should be experimentally determined.                                                                                                                                         |
