## NBP2-75754PCP

Tryptase alpha/beta 1 Antibody (TPSAB1/1961) [PerCP]	
Product Information	
0.1 ml	
Please see the vial label for concentration. If unlisted please contact technical services.	
Store at 4C in the dark.	
Monoclonal	
TPSAB1/1961	
0.05% Sodium Azide	
IgG1 Kappa	
PerCP	
Protein A or G purified	
PBS	
Product Description	
Mouse	
7177	
TPSAB1	
Human	
Mast Cell Marker	
This antibody reacts with mast cells distributed in skin, synovium, lung, and heart. This antibody does not bind with any other cell type. Human mast cell tryptase is considered to be an important marker of mast cell activation and is an important mediator of inflammation. Mastocytosis is a term collectively used for a group of disorders in which there is abnormal accumulation of mast cells in one or multiple organs. Anti-tryptase, combined with anti-CD2, anti-CD25, and anti-CD117, can be useful in identifying reactive mast cell hyperplasia, myelogenous neoplasms, mast cell leukemia, and mastocytosis.  Due to sequence identity this antibody will likely cross react with tryptase beta 2.	
Recombinant human Tryptase alpha/TPS1 protein fragment (around aa 115-233) (Exact sequence is proprietary) (Uniprot: Q15661)	
Product Application Details	
Immunohistochemistry, Immunohistochemistry-Paraffin, Protein Array	
Immunohistochemistry, Immunohistochemistry-Paraffin, Protein Array	
Optimal dilution of this antibody should be experimentally determined.
