| <b>Gene Symbol</b>             | POLY                                                                                                                                                                                                                                |
| <b>Species</b>                 | Virus                                                                                                                                                                                                                               |
| <b>Reactivity Notes</b>        | Dengue virus DENV-2 (Strain New Guinea C)                                                                                                                                                                                           |
| <b>Specificity/Sensitivity</b> | Dengue virus DENV-2 (Strain New Guinea C) Capsid protein/DENV-C                                                                                                                                                                     |
| <b>Immunogen</b>               | This antibody was produced from a hybridoma resulting from the fusion of a mouse myeloma with B cells obtained from a mouse immunized with purified, recombinant Dengue Virus Capsid Protein (Accession#: AHF52833.1; Met1-Arg100). |

| <b>Product Application Details</b> |                                                                        |
|------------------------------------|------------------------------------------------------------------------|
| <b>Applications</b>                | Western Blot, ELISA                                                    |
| <b>Recommended Dilutions</b>       | Western Blot, ELISA                                                    |
| <b>Application Notes</b>           | Optimal dilution of this antibody should be experimentally determined. |
