ROR gamma/RORC/NR1F3 Antibody (RORC/2942) [Janelia Fluor® 646]

| Product Information         |  |
|-----------------------------|--|
| Unit Size                   | 100 ul   |
| Concentration               | Please see the vial label for concentration. If unlisted please contact technical services.  |
| Storage                     | Store at 4C in the dark.   |
| Clonality                   | Monoclonal   |
| Clone                       | RORC/2942  |
| Preservative                | 0.05% Sodium Azide   |
| Isotype                     | IgG2a Kappa  |
| Conjugate                   | Janelia Fluor 646  |
| Purity                      | Protein A or G purified  |
| Buffer                      | 50mM Sodium Borate   |
| Product Description         |  |
| Host                        | Mouse  |
| Gene ID                     | 6097   |
| Gene Symbol                 | RORC   |
| Species                     | Human  |
| Specificity/Sensitivity     | This monoclonal antibody recognizes a protein of 63kDa, identified as ROR-C.<br>Its epitope maps in between aa1-50. The nuclear orphan receptors ROR and<br>ROR are members of the nuclear hormone receptor superfamily. Members of<br>this family act by directly associating with DNA sequences known as hormone<br>response elements (HREs) and typically bind DNA as either homo- or<br>heterodimers. RORalpha and RORgamma are unique in that they bind DNA as<br>monomers. RORalpha has multiple isoforms that share common DNA and<br>putative ligand-binding domains, but differ in their amino terminal domains, which<br>are generated by alternative RNA processing. RORgamma comprises a 560<br>amino acid protein that shares 50% amino acid identity with RORalpha and is<br>most highly expressed in skeletal muscle. Although these proteins are<br>considered orphan receptors, due to a lack of defined ligands, experimental<br>evidence has shown that melatonin may be the natural ligand for these nuclear<br>receptors. |
| Immunogen                   | Recombinant full-length human ROR gamma/RORC/NR1F3 protein (Uniprot: P51449)   |
| Notes                       | Sold under license from the Howard Hughes Medical Institute, Janelia Research Campus.  |
| Product Application Details |  |
| Applications                | ELISA, Protein Array   |
| Recommended Dilutions       | ELISA, Protein Array   |
| Application Notes           | Optimal dilution of this antibody should be experimentally determined.   |
