NBP3-11763-5Units**EV SEC Columns**

Product Information	
Unit Size	5 Columns
Concentration	Please see the protocols for proper use of this product. If no protocol is available, contact technical services for assistance.
Storage	Store at 4C.
Product Description	
Description	PURE-EVs are size exclusion chromatography (SEC) columns designed to isolate extracellular vesicles (EVs) from small volume samples. Compared to other techniques, PURE-EV efficiently separates EVs from circulating proteins while maintaining original shape and functionality of vesicles. Highly pure EV preparations, no residual chemicals from precipitation, and rapid isolation in approximately 20 minutes. Isolated EVs are suitable for a wide range of downstream analyses such as nanotracking analysis (NTA), protein profiling (western blotting, ELISA, Flow Cytometry), and nucleic acid extraction.
Suitable Sample Type	Biofluids or cell culture supernatant.
Sample Volume	500 ul - 2 ml
